

CEMEX ENVIRONMENTAL POLICY

At CEMEX managing our environmental footprint is an integral part of our business philosophy. We are fully committed to carrying out our business activities in an environmentally responsible and sustainable manner and to minimize the environmental implications of our activities.

To meet this Commitment we will:

- Actively pursue a policy of pollution prevention, applying best available techniques (BAT) to minimize the impact of our operations.
- Comply with company policies and procedures and all applicable local laws and regulations.
- Make strategic efforts to maximize our energy and resource efficiency, lower our carbon intensity and reduce emissions by managing our usage of energy, water consumption and waste generation.
- Responsibly manage the land within our operations to protect ecosystems and biodiversity and to maximize our contribution to nature conservation.
- Maintain open and effective communication channels with our employees, contractors, customers, the community and all those who work with us.
- Provide the necessary resources for instruction, training and supervision to appropriately manage the environmental aspects of our operations.
- Plan, review and assess our environmental performance against measurable targets and industry best practices to drive continuous improvement.
- Investigate, monitor and openly report our environmental performance.
- Define a product development agenda that prioritizes environmentally responsible products and services.
- Set corporate requirements to assess the sustainability attributes of our suppliers and subcontractors.

Everyone who works for the company is responsible for demonstrating correct environmental behaviors and reporting potential environmental risks, including among others employees, suppliers, contractors, third parties, and out-sourcing partners. Country Managers will be held accountable for clearly defining Environmental roles and responsibilities, providing appropriate resources, and measuring, reviewing and continuously improving CEMEX Environmental performance.
